Career Objective

Final-year (5th year) Computer Science Engineering student at Polytech Nice Sophia, specializing in IoT & Cyber-Physical Systems, seeking a 6-month end-of-studies internship in Embedded Systems, available from March 1, 2027.

Experience

Computer Vision & AI Intern, DNIIT (Da Nang International Institute of Technology) – Da Nang, Vietnam

May 2026 – Aug 2026

- Designed two novel perceptual hashing algorithms (CHash, RHash) and a multi-feature fusion model for real-time image duplicate/copy detection, reaching 85.6% retrieval precision and $F1 = 0.936$ on a 2,112-query benchmark.
- Built a two-stage computer vision retrieval pipeline (DINOv2 embeddings + FAISS/HNSW approximate search) followed by algorithmic scoring, and exposed it through a Dockerized FastAPI microservice.
- Co-authored a paper on the detection pipeline, accepted at IEEE-Blockchain 2026.

Web Developer Intern, Auguste.io – Grenoble, France

May 2024 – Jun 2024

- Designed and implemented an AI-powered feature for the Auguste.io platform that automatically places illustrations during a video montage.
- Built a video integration system that reduced processing time by 40%, automating short video compilation through transcription analysis.

Academic Projects

SophiaEats – Microservices Food Delivery Platform

2025

- Designed a backend with three microservices (Restaurant, Payment, AI Assistant) communicating via REST in Java.
- QA & OPS Lead** in a team of 5; responsible for code quality, infrastructure, and CI/CD.

LetsGoBiking – Self-Service Bike Routing System – github.com/Matt-Griff/LetsGoBiking

2025

- Designed and developed REST and SOAP APIs featuring a custom caching mechanism, a heavy client, and a web interface. Implemented real-time notifications using ActiveMQ.
- Stack:** C# (.NET), SOAP, ActiveMQ, OpenStreetMap, Leaflet.

Education

Master of Engineering (Diplôme d'Ingénieur) in Computer Science, Polytech Nice Sophia, Université Côte d'Azur – France

2024 – Present

- Specialization:** Internet of Things & Cyber-Physical Systems (IoT/CPS).
- Coursework:** Kernel Interaction, Software design, Data Ingestion Pipeline, Service-oriented computing, Machine Learning.

Computer Science (BUT Informatique), IUT Nice Côte d'Azur – France. Application development track.

2022 – 2024

Technical Skills

Programming Languages: C, C++, Java, Python, TypeScript, JavaScript, SQL, Bash, HTML, CSS, C#

Frameworks: FastAPI, Angular, Node.js, Spring Boot, .NET

Embedded & IoT: STM32, Zephyr, Linux, MQTT, JavaCard

Tools: Git, Linux, Docker, JUnit, RabbitMQ, Cucumber, CI/CD

Computer Vision & AI: PyTorch, OpenCV, FAISS, Deep Learning, Machine Learning

Languages: French (Native), English (C1 – TOEIC 960), Spanish (B1)

Soft Skills

Teamwork

Active Listening

Attention to Detail

Curiosity and Eagerness to Learn

Hobbies

University football team member

Running

Geography

Board games
